## OBJECTIVES & INVESTMENT POLICY

### Objective

The Sub-fund's investment objective is long term capital appreciation

### Investment Focus

The Fund is an equity fund that invests primarily in Small- and Mid-Cap companies listed for trading on Swedish stock market. The Fund is also able to invest up to 10 percent in small and mid-cap companies listed for trading on other Nordic stock markets. The Fund is actively managed and does not track any index. Stocks are selected based on the Fund's own assessments. The Fund invests in small and medium-sized enterprises, without limitation regarding company or industry. The Fund invests at least 90 percent of its net asset value on the Swedish stock market and is able to place up to 10 percent in the Nordic equity market. The Sub-Fund may from time to time make use of financial derivatives or instruments (exchange traded) for efficient portfolio management and/or hedging purposes only. The Sub-fund may not make use of OTC derivatives. The Shares in the Sub-fund will accumulate any income.

Shareholders may request the redemption of shares through the management company, custodian bank or paying agents at any time. The management company will be required to redeem shares for the account of the Fund at the applicable redemption price on any dealing day. The dealing day is defined as every day on which banks and stock exchanges are open for business in Luxembourg. The management company is entitled to temporarily suspend the calculation of the value of shares if this is in the best interest of the shareholders and for so long as circumstances persist that require such temporary suspension.

A typical investor should take into consideration that the Sub-fund portfolio has a high volatility. Investments in the Sub-fund might entail a high risk and is appropriate only for persons who can accept the possibility of capital losses.

The Sub-fund is designed for investment only by those investors, who understand the degree of risks involved and believe that the investment is suitable based upon their investment objectives and their financial needs. The time horizon for a typical investor should be more than 5 years.

## RISK AND REWARD PROFILE

Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may change over time. Even the lowest category does not mean 'risk free'. The Sub-fund has been categorized SRRI 6 because its net asset value shows high volatility leading to adequate probabilities for losses as well as gains.

### What does this risk and reward indicator mean?

- The risk category for this Sub-Fund was calculated using simulated historical data. The risk category may not be a reliable indicator of the Sub-Fund's future risk profile. The risk category shown is not guaranteed and may change over time.
- The seven-category scale is complex, for example 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 5 and 6. A category 1 sub-fund is not a risk-free investment – the risk of losing your money is small, but the chance of making gains is also limited.

### Which materially relevant risks are not adequately captured by the synthetic risk and reward indicator?

- Liquidity risk: low liquidity might result in that it would be difficult or impossible to buy or sell an investment in a timely manner and that the price could be lower or higher than expected.
- Counterparty risk: the risk that a counterparty does not fulfill its obligation to the sub-fund (e.g. not paying an agreed amount or not delivering securities as agreed).
- Currency risk: the Sub-Fund may hold some of its investments in currencies other than the Sub-Fund's reference currency. Thus the value of the Sub-Fund may rise and fall due to currency movements.
- Operational risk: the risk of loss resulting from e.g. system breakdowns, human errors or from external events.

Additional information concerning the risks of investment is indicated in the corresponding sections of the prospectus of the fund.
